

Ring the Romance

Just as personality plays a part in the shape of your engagement ring, so it does with your dream getaway. Here's a clever guide of honeymoon hot spots to help the two of you "ring" the romance.

Can't decide where to make those honeymoon memories? Look no further than your left hand, that is. If your engagement ring sports a Leo Diamond™ from Kay Jewelers chances are you and your honey would hit it off in Bermuda.

Passionate about the princess cut? Perhaps you'd prefer a St. Martin tête-à-tête, with pampering on a royal scale. "The shape and quality of a diamond are important, but in my opinion, the correlation between a person's personality and the diamond he or she chooses has been underplayed," says Jerry Ehrenwald, GG, ASA, and president of the International Gemological Institute in New York. "In fact, the choice of shape tells a lot about personality."
